DESIGN COMMITMENTS

DESCRIPTION OF PROPOSED ARCHITECTURE

- Traditionally inspired architecture based on Eclectic Colonial Revival. Designs based on examples in "A Field Guide to American Houses" by Virginia McAlester (Refer to pages 326 - 329).
- The rooflines will have low to medium pitched roofs, with wide overhangs and a continuous trim detail at the freeze line to be used everywhere. Overall roof mass to be broken into segments.
1. The first floor will have masonry veneer.
2. The second floor will have a variety of cladding; brick veneer, horizontal siding and cementitious panel and trim. All cementitious material to be painted.
3. Roof shingles are fiberglass.
- d) 1. Buildings will have at least one porch on the front or side elevations. Bay windows will use brackets below and metal roof above.
2. The stairways to the unit will be set back in from the facades. They will be located in an alcove with walls on three sides, and use a porch rail on the 2nd floor level.

DESCRIPTION OF HOW PROPOSED DESIGN WILL FIT INTO THE CONTEXT AREA

- Design will transition between the single family community on Yellowstone Drive to the west and the much larger 1520 Megolia multifamily apartment complex on Exchange Place across Barbree Road to the east. This will be accomplished primarily via building height, providing two-story buildings that move from the single-story houses on Yellowstone Drive to the three-story buildings on Exchange Place. The inclusion of brick veneer along the first floor of the proposed design will also suggest a reflection of the use of brick veneer on the houses on Yellowstone Drive.
- The proposed development improves an infill vacant parcel within an existing development, characterized as a blend of single family and multifamily housing.

GENERAL NOTES

- IF REQUIRED TO PROVIDE TSS REMOVAL, ALL IMPERVIOUS SURFACE AREAS SHALL BE TREATED BY THE BMP(S).
- DEVELOPMENT PLAN WILL ADHERE TO ALL SOLID WASTE REGULATIONS AS LISTED IN DURHAM CITY CODE, CHAPTER 10 AND THE UNIFIED DEVELOPMENT ORDINANCE, ARTICLES 7 AND 9.
