A1.0

Date June 29, 2011
To Beth Timson
From Ellen Cassilly on behalf of Durham Central Park
Project The Leaf (shade structure at Durham Central Park)
Subject Public comments from June 25th to 29th

- Oh, it's smaller than I imagined.
- I like it.
- Cool!
- I'm glad to see a canopy.
- These drawings are amazing, the students are really working hard.
- I like the model, it looks a lot better than on my computer screen.
- I'd like to see the whole thing larger..... oh now I understand the impervious surface constraints so I guess that it's OK.
- Don't use a nylon fabric for the shade cloth use a fiberglass fabric.
- Don't use 'S' hooks to connect the shade cloth, use eye hooks.
- I think that the image I saw showed the structure backward.
- I see the shade now, It's more like a trellis with filtered light than complete shade. And I might need to move as the sun moves.
- You could have you birthday party in there.
- Very sculptural.
- So it would work well for 3-5 musicians pretty well. And there's sort of two performing areas – one facing up the hill and the other facing down the hill.
- Fabulous.
- It will be great to have more seating in the park.

Lots of questions about materials. location, size, ability to hang a movie screen and starting/finish dates
