RE: September 6, 2012 Work Session

I am looking forward to the opportunity to share our 2011-12 student performance assessment data with you during your September 6th work session. We are encouraged by our continued improvements in student academic performance. Over the past two years we have shown increases in student test scores and in our graduation rates. During my presentation, I will highlight our graduation rates, end-of-grade and end-of-course proficiency scores, and our growth data.

Our teachers, administrators, students, and community partners are to be congratulated for their commitment to increasing student achievement. Together we are clearly making a positive difference.

Thank you.
