

NC-54/I-40 CORRIDOR BLUEPRINT FOR MOBILITY

Final Master Plan
Durham City Council

November 18, 2013

Background

70,000 vehicles per day

by 2035

Study Purpose

Analyze land use and transportation issues and trends

Evaluate opportunities and challenges for future development

Recommend short- and long-term solutions and strategies

A map of a region with a highlighted corridor. The map shows various locations including UNC Campus, Old UNC Cemetery, Glen Lennox, Glenwood Square, Glenwood Elementary School, and Glenwood Middle School. A blue line highlights a corridor running through the region. The map also shows roads like 86 and 7, and rivers like the Roanoke River and the James River.

Vision

Regionally significant multimodal corridor that serves both regional and local travel through an expanded and more efficient network of streets, bus routes, bicycle facilities and pedestrian enhancements.

Promote community livability by guiding future development into targeted mixed-use areas to reduce trip lengths, enable greater use of non-auto travel options and provide location-efficient choices for housing and transportation.

Groups

Workshops

Study Process

Focus Groups/Workshop1

- Challenges/Opportunities
- Data Collection/Analysis
- Community Profile (February 2010 workshop)

Workshop 2

- Trend Analysis
- Scenario Development/Testing
- Initial Preferred Scenario

Targeted Outreach/ Workshop 3

- Full Analysis Preferred Scenario
- Refined Recommendations
- Draft Plan

Additional Hearings and Adoption

- Additional analysis
- DCHC MPO adopts Final Master Plan (May 2012)

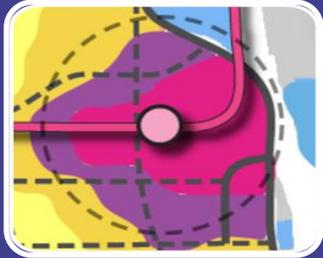

What we learned

- Development will continue to occur
- The growth in traffic from adopted plans will result in significant congestion
- There are insufficient alternatives for parallel routes
- Existing development patterns and densities do not support transit or encourage non-motorized trips
- Vehicle trips destined to the Friday Center and UNC contribute significantly to peak congestion – approximately 70% originate in Durham and points east
- There is a public desire for multimodal options

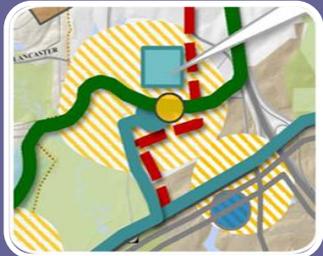

Recommendations

Land Use/Transit/Bicycle-Pedestrian

Nodal Land Development Pattern

- Guides growth into existing /emerging centers
- Opportunities to capture short trips via walking or biking
- Focal point for transit with focused, diverse activity

Transit

- Expanded service and improved connections
- LRT connects corridor with the region
- Flex route shuttle service for low density areas

Pedestrian/Bicycle Improvements

- Connectivity
- Increased Safety
- Complementary

Recommendations

Park and Ride/Roadway

Park and Ride – Linkages for Success

- Frequent, reliable, and convenient transit service
- Roadway recommendations provide accessibility
- Land use influences usage
- New locations proposed

Short to Mid-Term Roadway Improvements

- Geometric & connectivity improvements
- Construct collector street system
- Widen NC 54 to 6-lanes in Durham County to match existing
- Increase efficiency /safety through Superstreet design

Long-Term Major Investment

- Improve I-40 interchange (ramps and widening) – Fig 6-20
- Farrington Road Flyover Ramp – Fig 6-4
- Ramp access into proposed Leigh Village Fig 6-22, 6-23

Today

Transportation Impacts

2040 Metropolitan Transportation Plan

- NC 54 widening, superstreets and grade separations
- Light Rail Transit (LRT)
- Farrington Road realignment and interchange slip ramp
- Leigh Village access to NC 54 (collector street plan)

FY2012-2018 Transportation Improvement Program

- Slip ramp, northbound Farrington to I-40 eastbound (by 2015 in FY12-18 TIP)
- NC 54 widening with bike lanes and pedestrian facilities (by 2022 in draft FY 14-20 TIP)

Development Review -- Transportation

- Development must be consistent with adopted NC 54 Corridor Master Plan

Today

Land Use Impacts

Comprehensive Plan

- NC 54 has conceptual land use plan
- Guide local governments in amending comprehensive plans and regulations

Station Area Plans

- Planning will conduct station area planning for all light rail stations
- Implementation of transit-oriented design district for the Leigh Village station area

Development Review

- Refer to NC 54 Study in development review
