 - Deniz has been working on these items and made some proposed revisions to 7 policies that were at least somewhat related to development projects. The committees would like to ask that this be revised to have them listed under Development, would also like to propose two new policy options to encourage building infrastructure for bike and pedestrian traffic when street resurfacing projects occur and encourage better collaboration between contractors and communities to make timely improvements.
 - Further revisions to the wording were completed during the BPAC meeting via input from Commission members and guests at the meeting.
 - Motion to approve sending the proposed revisions, modifications and two policy revisions as a commission to Lisa Miller was made by Ed Rizzuto, seconded by Brian Hawkins. Motion approved.

- First Meeting: spent a good part of meeting looking at issue from Wood Lake resident concerned with pedestrian/bike travel in the area. A portion of Woodcroft Parkway has no bike lanes and/or sidewalk.
