

Each of the posters here depicts a potential design concept for future development of the existing DPD HQ site. It is important to remember these are ideas, and do not actually represent finalized buildings or plans. Our goal is to gather your reaction to these different designs, so we can incorporate your feedback as we work to refine these ideas and come up with more concrete potential site programs. Our main priority is to understand your aspirations for the future of the site along the following aspects:

1. Mix of Uses:

Which design idea presents the mix of uses you like best?

2. Intensity:

Which design idea presents the level of intensity (height and density) you'd like to see happen at the site?

3. Orientation:

a. Which design best matches your idea of how development should be oriented?

b. Where would you most like to see open space included?

4. Preservation of Existing Building:

Do you prefer design ideas where the existing building is kept and incorporated as part of new development or designs where the existing building is not retained to make way for new development?

5. Other Comments:

Is there anything else about the design ideas that you would like to comment on?
(Feel free to use the back of this sheet)
