

**NOTES:**

1. Type of street section shall be chosen according to the table of minimum design requirements for public and private residential streets in Section 9.0, Reference Guide for Development.
2. See Pavement Design Requirements – Section 9.0, Reference Guide for Development: <http://durhamnc.gov/DocumentCenter/View/3331> for paving and base cross section design.
3. For a 30" straight curb section the street width shall be 33' back-to-back and the verge width shall be 9.5'.
4. Bays are located on one side of the street only. Bays may alternate from one side of the street to the other, but cannot be located one both sides of the street at any one location.
5. A 5' transition is required between the curb and gutter and the valley gutter.
