How will we synthesize and draw conclusions from what we learned from townhall? Then, next, how to summarize our learnings into recommendations (including process and design questions, e.g., points of interventions, pilot programs, response teams).

Prompts for quarterly report for taskforce (Due Nov 7th):

- What challenges have you faced this quarter in conducting your review of existing resources?
- What successes have you experienced in conducting your review of existing resources?
- What have your reviews of existing resources (or listening sessions/town halls, etc.) revealed about community safety needs currently being addressed?
- What additional insights or concerns related to your roundtable would you like to share with the community at this time?
- [Optional; only as applicable] What recommendations for improvements to current programs or implementation of proposed programs are you considering at this time?
